

INFORMATION NEEDED FOR YOUR LOGIC MODEL

Examples

Evidence-based practices

What's your objective	Proposed Activities	Measurable Outputs (within Year 3)	Who's doing it?	Target Population	Link to Steps Outcomes
Provide glucose screenings for the city of Cleveland to raise awareness of diabetes	Conduct blood glucose screenings throughout Year 2	~Minimum of 500 individuals are screened ~List of referral physicians that have received patients	Part-time Nurse	At risk populations within Cleveland that lack access or information on the necessity of testing	This program will raise awareness and education of the medical concerns related with diabetes and the proper medical treatment available to those that are affected by this condition.
Encourage programmatic techniques that will benefit other Cleveland neighborhoods	Promote Active living by Design concepts, including Safe Routes to School, to other interested communities within Cleveland.	~ At least one meeting per month with various interested neighborhoods, documented with meeting agenda and attendance records	Two part-time staff members	Neighborhood stakeholders	With the addition of Active Living by Design concepts, many neighborhoods will be able to create a safer environment to allow for increased physical activity and community involvement.
Coordinate and provide outreach to families about the importance of nutritional	Nutrition education presentations and food demonstrations in the seven Steps K-8 intervention schools	~ One nutrition education presentation and food demonstration offered to parents at each of the seven K-8 intervention schools. ~Minimum of 25 participants at each event	Full-Time Dietician	Families of students who attend one of the seven K-8 intervention schools	Increased knowledge of meal ingredients and preparation skills that are healthier and will benefit their diet.
Increase awareness among health professionals about cultural sensitivity towards Asian Americans in order to promote healthier living.	Provide trainings in organizational cultural competence. Design an evaluation tool to assess the efficacy of the organizational cultural competence training, analyze data and make a full report available to the Cleveland Department of Public Health	~Two trainings ~Minimum of 25 participants at each training ~Evaluation tool (pre and post test) ~Final report of analyzed data	Full-Time Bilingual Staff Member	Clinical and healthcare professionals, such as physicians, nurses, social workers, dieticians, etc.	Cultural competency among clinical and healthcare professionals will increase the awareness and education of diet, physical activity, smoking, and diabetes to Asian Americans within the Cleveland neighborhoods.

THESE ARE WHAT WE WILL USE TO ESTABLISH YOUR SCOPE OF WORK AND WHAT WE WILL MONITOR DURING THE YEAR. PLEASE BE SPECIFIC AND REALISTIC!

WE LOOK AT THESE TO DETERMINE DIVERSITY IN DELIVERY AND PROPOSED PROGRAM REACH

WE LOOK AT THESE TO DETERMINE HOW THEY LINK TO THE OVERALL STEPS OUTCOMES, WHICH ARE MEASURED THROUGH SURVEILLANCE.
