

## **The Cuyahoga Valley Initiative**

**Paul Alsenas  
Director  
Cuyahoga County Planning Commission**

**The Cuyahoga Valley Initiative (CVI) seeks to provide the tools necessary for the community to sustainably revitalize the Valley and make it, once again, an economic force, environmental treasure, and unifying element of the region.**

**The CVI is unfolding based on core principles and approaches which view land and the community's relationship to it in ways very different from historic economic development practices.**

**Moreover, the CVI has been creating a Framework for Action and Learning, adopted information technologies for sustainable and integrative decision making and a network of collaborators.**

**An update on these elements and the progress of CVI comprise this presentation.**
