HealthSpan Physicians to Close Urgent and Emergency Services at Cleveland Heights and Parma Locations

MetroHealth to Open Freestanding Emergency Departments in Cleveland Heights and Parma in February 2016

As you may have heard, HealthSpan Physicians will cease operations of its urgent and emergency services at the Cleveland Heights and Parma Medical Centers. MetroHealth will soon be opening freestanding Emergency Departments in these locations.

WHAT THIS MEANS FOR YOU:

• HealthSpan Cleveland Heights urgent and emergency services will close on January 31, 2016. Beginning February 15, 2016, MetroHealth will open a freestanding emergency department in HealthSpan’s Cleveland Heights Medical Center.

• HealthSpan Parma urgent and emergency services will close on February 14, 2016. Beginning February 29, 2016, MetroHealth will open a freestanding emergency department in HealthSpan’s Parma Medical Center.

• You can continue to visit HealthSpan’s emergency departments up to the closing date at each location if you need urgent or emergency care.

• After HealthSpan ceases operating its emergency services at HealthSpan’s Cleveland Heights and Parma Medical Centers, you can visit the freestanding emergency departments at these locations under MetroHealth’s management beginning at the dates noted above.

• The MetroHealth System is a leader in Emergency Medicine. Many Healthspan Emergency Services physicians have joined the MetroHealth team to ensure that residents of these communities will have around-the-clock access to the excellent emergency care for which MetroHealth is known. The emergency departments will be open 24 hours a day, seven days a week and will be operated by MetroHealth emergency department staff with the same high level of education, training and certification as those who staff the emergency department on MetroHealth’s main campus.

For your convenience, on the back of this flyer, you’ll see a list of preferred urgent care and emergency departments should you have a need for urgent or emergency care.

Keep in mind that the Emergency Room is meant for true emergencies including, but not limited to, chest pain, continuous bleeding, shortness of breath, head injuries or unconsciousness. If you have a true emergency, call 911 or go to your nearest emergency room.

A visit to the emergency room typically has higher out-of-pocket cost to you than a visit to an urgent care center. When you need immediate care but don’t have time to see your doctor, urgent care can help you with many common conditions like flu and cold, high fever, vomiting and stomach pain, cuts and severe scrapes, broken bones, minor injuries and burns and common sports injuries and more.
