

How To Buy: Medical Research Gases

COMMODITY DESCRIPTION

This commodity includes medical research gases and related supplies.

VENDOR: [Praxair](#) **VENDOR CLASSIFICATION:** [Strategic Business Partner](#)

Compressed Gas Cylinders

Gas cylinders remain the property of the vendor. Cylinders are tagged upon receipt and a monthly demurrage charge is applied until a cylinder is returned to the vendor. All gas cylinders must be ordered through a Peoplesoft eProcurement Requisition to insure proper tracking of cylinders.

Liquid Nitrogen and Liquid Helium

Liquid nitrogen and helium are delivered directly to departments by the contracted vendor. Departments can establish blanket purchase orders which allow orders to be placed on an "as needed" basis directly with the vendor. Orders must be called in before 2:00 p.m. to insure next day delivery. Volume price discounts have been established. If your department does not wish to set up a blanket purchase order then you must create a Peoplesoft eProcurement Requisition. Fill out a purchase requisition and fax (216-368-5088) or mail to the Purchasing Department, Cedar Avenue Service Center, Location Code 4910.

TIP: For a quick link to the top 100 gases click on the "Search Catalog" icon on the Peoplesoft eProcurement page. Click "All Purchasing Catalog Items" and then "Gases & Gas Supplies for Research". From there you can easily populate the requisition with the items you want to purchase.

PROCUREMENT OPTIONS & PROCEDURES

<i>If your total purchase is:</i>	<i>Then use:</i>
<i>\$1,500 or less</i>	<i>a Peoplesoft eProcurement Requisition</i>
<i>Above \$1,500</i>	<i>a Peoplesoft eProcurement Requisition</i>
