The School of Medicine enhances human health by translating research from lab to life and training medical leaders to address today’s most pressing health needs—at the level of the individual, community, nation and world. The School of Medicine is the largest medical research institution in Ohio and is among the nation’s top medical schools for research funding from the National Institutes of Health.

Since its founding in 1843, Case Western Reserve University School of Medicine has been an innovator in medical education and research discovery.

Enrollment
861 MD students
697 University Program
164 Cleveland Clinic Lerner College of Medicine (CCLCM)
427 PhD students
324 MS students
Of these students, 86 are enrolled in the combined MD/PhD program, as well as other dual degrees.

Affiliated Hospitals
University Hospitals Case Medical Center
Cleveland Clinic
MetroHealth Medical Center
Louis Stokes Cleveland Department of Veterans Affairs Medical Center

Dual Degrees Include
MD/JD
MD/MA (Bioethics, Arts)
MD/MBA
MD/MPH
MD/MS (Applied Anatomy, Bioinformatics, Biomedical Engineering, Biomedical Investigation, Nutrition, Systems Biology)
MD/PhD
Points of Pride

> The economic impact of the School of Medicine and its academic health care industry on the state of Ohio equaled $5.82 billion in 2007. Further, the School of Medicine and its core and noncore teaching hospital affiliates accounted for more than 65,000 Ohio full-time equivalent positions and $169.1 million in total state tax revenue. Graduates of the School of Medicine that remain in Ohio to establish medical practices account for an additional economic impact of $173.9 million annually (Tripp Umbach, 2008).

> The school’s innovative and pioneering Western Reserve2 curriculum interweaves four themes—research and scholarship, clinical mastery, leadership and civic professionalism—to prepare students for the practice of evidence-based medicine in the rapidly changing health care environment of the 21st century.

> 200+ inventions from the School of Medicine have been licensed to commercial entities, 20 of which are new startup companies founded to commercially develop the invention.

> The school attracts robust funding to participate in, and lead, national and international trials, such as:
  - $160 M annually to Case Comprehensive Cancer Center
  - $64 M Clinical and Translational Science Award
  - $26 M National Children’s Study
  - $19.7 M Tuberculosis Trials Consortium (international clinical trials site)
  - $12.5 M Obesity and Blood Pressure in Urban Youth Study
  - $10 M Retinal Disease Research
  - $9 M Case Center for Aids Research (study center)
  - $7.9 M Malaria Research (center of excellence)
