

Internal Use Only Information

The types of information listed below are examples of information that is for internal university use only. If disclosed, it is considered to have a moderate level of impact upon the university. In general, all IT systems containing Internal Use Only information require user authentication using a valid CWRU Network ID for access to the information. [Tier I](#) and [Tier II](#) Controls apply to systems with Internal Use Only Information. Note that CWRU Google Apps *may* host Internal Use Only information when protected by network authentication. Examples are:

- university administrative information
- strategic plans
- internal only communications
- home phone numbers
- student directory information suppressed by [FERPA](#)
- student grades
- photos from the student directory
- citizenship
- visa status
- redacted Social Security Number (last four digits only)
