

Recording Video

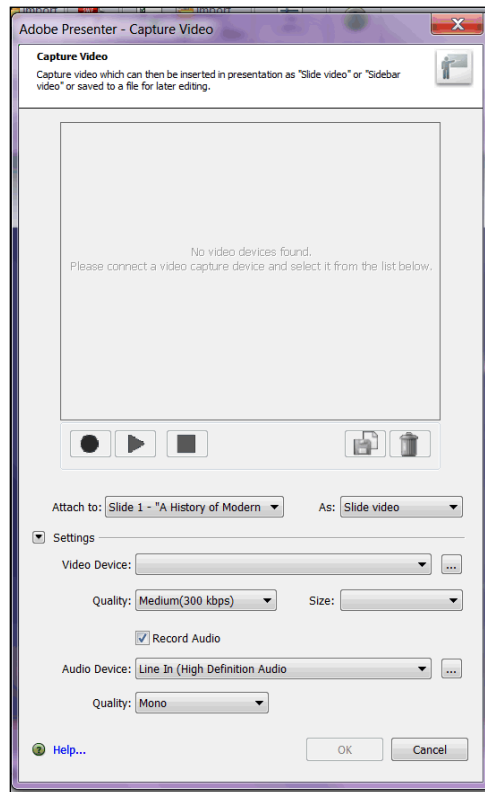

Concept

In the world of online courses, it is common for students to never see more than a picture of their instructor. The ability to record video in PowerPoint using Adobe Presenter allows you to make a video recording of yourself and others using a webcam or other digital device. This topic will explain how to set up and record video using Adobe Presenter.

Procedure

Begin by activating your computer's built-in camera or plugging in a webcam or other digital recording device. Open a PowerPoint presentation.

Step	Action
1.	Activate the Adobe Presenter tab. Click the Capture button.

Recording Video

Step	Action
2.	<p>The Capture Video wizard appears.</p> <p>At the top of the wizard is a window for the image captured by your webcam or other device. If your device is not attached, the window will be grey.</p>
3.	<p>The Settings area of the wizard contains fields in which you can select your recording and audio devices, as well as the quality and size of the files that will be issued from them.</p>
4.	<p>If the Video Device field is blank or contains the name of a device that is not being used, click on the field and select the appropriate device.</p>
5.	<p>To record video, click the Record button. To stop recording, click the Stop button. To play back the video, click the Play button.</p> 
6.	<p>Presenter gives you the option to save your video as an external file for later editing in Presenter or another application by clicking the Save As button.</p> 
7.	<p>If you are dissatisfied with your video, you can delete it by clicking on the Trash button.</p> 
8.	<p>Use the Attach to: dropdown field to select the slide to which the recorded video should be attached. You are also given the option to attach the video to the slide itself or to a sidebar area that appears next to the slide once the presentation is published.</p> 
9.	<p>When you are finished recording video and have selected the appropriate settings, click the OK button.</p> 
10.	<p>You are returned to the presentation.</p> <p>Remember to click the Save button from time to time so that your work is not lost.</p> 
11.	<p>This completes the process of recording video in PowerPoint using Adobe Presenter.</p> <p>End of Procedure.</p>
