PETER B. LEWIS BUILDING

Dedicated in 2002, the Peter B. Lewis Building is home to the Weatherhead School of Management. Named in honor of lead donor Peter B. Lewis, chairman of the Progressive Corporation, and designed by world-renowned architect Frank Gehry, the building is the most advanced management school facility in the world and reflects Weatherhead's international reputation for innovative management education. Interior spaces are specifically designed to encourage informal student-faculty interaction, making teachers and students equal partners in the learning process. Multiple classroom configurations

Peter B. Lewis Building

accommodate a variety of teaching techniques and group interaction. No two classrooms are exactly

alike, so students are constantly faced with changing perspectives.
