CLAPP HALL

Clapp is a four story wing of the Agnar Pytte Science Center that contains both offices and classrooms. It is named after M. Roger Clapp and Anne M. Clapp. The Agnar Pytte Center for Science Education and Research--named in honor of Case President Agnar Pytte upon his retirement from the University in 1999--is the culmination of a four-phase project that began in 1996. The project's mission, now complete, was to build new facilities and improve existing science structures to create state-of-the-art classrooms, research laboratories, and faculty offices for biology and chemistry. These are two of the most popular undergraduate majors in the

Clapp Hall from Adelbert Road

College of Arts and Sciences, and the research conducted by their faculty and graduate stu-

dents competes annually for significant external support.
